

## PT Treadmill - 4.0T

### Stands up to the miles

The PT Treadmill - 4.0T delivering to those users' needs that regular treadmills have neglected for too long.

The 4.0T is packed with useful functionality and its quality build provides durability and reliability for commercial therapy uses.

## Benefits

### Front and rear motors allow true up and downhill walking

With lift motors located at the front and rear of the deck, the walking surface replicates true uphill and downhill exercise to incorporate different muscle groups and tendons than flat walking. Incline and decline adjusts in 0.5 percent increments to fine-tune the program.

### The full-length handrails maximise safety

This treadmill is ideal for users who have challenges with balance, coordination and mobility, or individuals who are less sure of themselves on a treadmill. The handrails span the length of the generous 56 x 152 cms walking surface for improved balance and better user confidence.

### Intuitive, easy-to-read display and USB port

The new LED console features a big, easy-to-read dot matrix display, and three windows for readouts. This includes many indicators according to users' program selections. Users can take in all of the information at one glance. The overlay enables intuitive operation with easy-to-identify colour contrast and quick buttons to switch between Fitness, METs, HR programs, and physical testing protocols.

## Specifications

Incline	-5% to 15%
Speed	0.48 to 29 kph / 0.3 to 12 mph
Motor	4HP continuous duty
Belt and Deck	56 cm x 153 cm / 22" x 60" self-lubricating deck
Power	AC 100-120V for North America AC 200-240V for EMEA
Max User Weight	180 kg / 400 lbs
Dimensions	212.5 cm x 147 cm x 88.5 cm / 83.6" x 57.8" x 34.8"
Product Weight	197 kg / 434 lbs
Certifications	CE Class SA UL (Commercial grade) EN957
Warranty	Provided upon request with your local distributor
