

REHABILITATION STAIRCASES DOUBLE FLIGHT STAIRS

Rev. 01 07/2022

Powder coated steel structure, zinc-chromate sliding parts. Telescopic, height-adjustable, powder coated metal anatomic handrails. The knobs prevent the loosening and movement of the handrail when used by patients. Nonslip PVC covered closed steps in two different heights. The stairs can be set in a straight position as well as in a corner position.
